

Healthcare professionals with knowledge in complex wound care are in great demand. As more and more complicated wound cases surface, it is paramount to have professionals equally competent and qualified to face these challenges head on.

The Certificate in Clinical Wound Care is the only programme of its kind in Malaysia which provides healthcare practitioners with the specialised knowledge and proficiency required to work in a practice setting with patients impacted by complex wounds resulting from a variety of disease pathologies and factors.

The programme focuses on topics ranging from understanding the anatomy and physiology of wound healing till the choice of dressing and offloading as well as a thorough exploration on the management of various types of complex wounds. Effective wound management requires detailed diagnosis and treatment by a capable and qualified professional. Upgrade your skills and get recognised today. Enrol for the Certificate in Clinical Wound Care programme.
